

## Steam locomotive 01 202, Verein Pacific 01 202

714504 | **EINSTELLER**

railway company: EINSTELLER

**339,90€**

Photomontage

Steam locomotive 01 202 of the Verein Pacific 01 202.

- Version as a museum exhibit locomotive
- Smoke chamber door with central lock
- Elaborate printing on the boiler rings and wheel tires
- Additional alternator
- Version with open front apron and "Witte" smoke deflectors
- Unobstructed view between the boiler and chassis

The express steam locomotive 01 202 is a living piece of engineering history. Built in 1936 by Henschel & Sohn in Kassel for the former Deutsche Reichsbahn, it later entered service with the Deutsche Bundesbahn after World War II, from which it was primarily used in southern Germany. Its final years in active service were spent at the Hof depot, where it frequently operated on the steep gradients of the inclined plane.

On October 2, 1975, the 01 202 arrived in Switzerland. There, it was painstakingly restored to operating condition by Werner Bühlmann of Münsingen, together with a dedicated group of passionate, optimistic volunteers, working in their spare time without pay. Thanks to more than 20 years of continuous effort, the locomotive is now considered the finest operational specimen of the Class 01 and remains in remarkably well-maintained condition. Since 1991, the Pacific 01 202 Association has been responsible for all aspects of the locomotive's maintenance and operation.

## General data

Coupling	Close coupler motion link between locomotive and tender, NEM shaft 355 with close coupling mechanism at the tender
Minimum radius	192 mm
Number of driven axles	2
Number of axles with traction tyres	2
EAN	4005575258692
Interior fitting	Driver's cab
Scale	N
Epoch	V-VI
Railway Company	EINSTELLER

## Electrical

Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units Next18

## Measurements

Length over buffer	150 mm
