railway company: DB

479,90€

Photomontage

Steam locomotive 50 1751 of the Deutsche Bundesbahn

Drive on two axles of the tender and via a cardan shaft on all five driving axles of the locomotive.

- 4-dome boiler design without bell
- With small lamps on the front buffer beam
- Fine metal wheel sets and drive and coupling rods made of cast metal

Originally, the class 50 locomotives were equipped with a bell. During the implementation of safety compliance measures, the bell was removed. Later, due to boiler replacements and conversions, locomotives with lower numbers were also found to be without bells.

General data

Coupling	NEM shaft 362 with close coupling mechanism at the tender
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	7
Number of axles with traction tyres	2
Article number	7110046
EAN	9005033385972
Scale	H0
Epoch	III
Railway Company	DB

Electrical

Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
LED head light	yes
Sound	yes
Control	DC Digital
Interface	Electrical interface for traction units PluX16
Digital decoder	PluX16

Measurements

Length over buffer	265 mm
