

Diesel locomotive 290 276-5, DB

7300106 | **DB**

railway company: DB

199,90€

Photomontage

Diesel locomotive 290 276 of the German Federal Railways.

Completely new design!

- Purple paint finish as a classic German Federal Railway model
- Unobstructed view through the detailed driver's cab
- Delicate reproduction of all engravings
- Metal stems for perfect traction
- Delicately crafted safety railings
- Wheelsets with low wheel flanges
- Easily retrofittable electric shunting coupling in standard shaft with solder points already prepared on the circuit board (item to be announced)

With the V 90 diesel locomotive, the German Federal Railways put a new generation of powerful shunting locomotives into service in the mid-1960s. Based on the design principles of the proven V 100, the V 90 was developed specifically for heavy shunting and light line service. The extended frame, significantly higher service weight and more powerful engine made the V 90 a durable workhorse in daily operation.

The ROCO Class 290 is a prototypically detailed model that stands out thanks to its excellent running characteristics and high tractive force. Thanks to its reliable technology and proven spare parts supply, ROCO guarantees long-term operating enjoyment on any layout.

General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	4
Number of axles with traction tyres	1
Article number	7300106
EAN	9005033391270
Scale	H0
Epoch	IV
Railway Company	DB

Electrical

Motor	5-pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units PluX22

Measurements

Length over buffer	165 mm
