Photomontage

Diesel locomotive 232 592 of Erfurter Bahnservice GmbH.

- Powerful, reliable model for prototypical long trains
- Used in freight transport in many parts of Germany
- In digital operation with switchable shunting light and switchable headlight/tail light

For over 15 years, Erfurter Bahnservice has provided a wide range of services using various types of traction. In addition to goods trains, it also has special passenger trains ready for operation. Much of the necessary work on the fleet is carried out at the company's own vehicle workshop in Karsdorf, enabling EBS to ensure smooth operation for its customers.
