

## Diesel locomotive 2095.13, ÖBB

7540007 | **ÖBB**

railway company: ÖBB

**239,00€**

Photomontage

Diesel locomotive 2095.13 of the Austrian Federal Railways.

- Finished in true to the original paintwork
- Down to the finest detail: free-standing handle rails, intricate lamp rings and a perforated ventilation grille on the roof
- Model with embossed trim lines
- Switchable headlight with DIP switch

The class 2095 locomotives procured from 1958 onwards formed the backbone of the ÖBB on the diesel-powered narrow-gauge lines for decades. They were used for passenger and freight traffic, especially for rolling stock/roller wagon transport. The 2095s were used on the narrow-gauge lines of the Ybbstalbahn, the Bregenzerwaldbahn, the Krimmlerbahn, the Waldviertelbahn and on the so-called "Krumpe" lines. The latter formed the now disused local railway from Ober-Grafendorf to Gresten.

## General data

Minimum radius	200 mm
Flywheel	yes
Traction tyres	2
Number of driven axles	4
Article number	7540007
EAN	9005033388669
Scale	H0e
Epoch	III
Railway Company	ÖBB

## Electrical

Motor	5-pole motor
Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units PluX22

## Measurements

Length over coupling	120 mm
